

Hospital Filtration

Total Filtration for Hospitals & Healthcare Facilities

Product Line

- Pre-Filters
- Final Filters
- HEPA & Higher

FILTRATION GROUP

Leading The Way In Hospital Filtration

Total Filtration

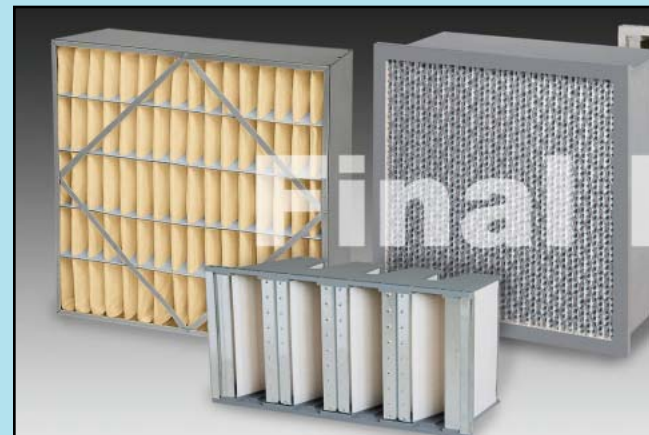

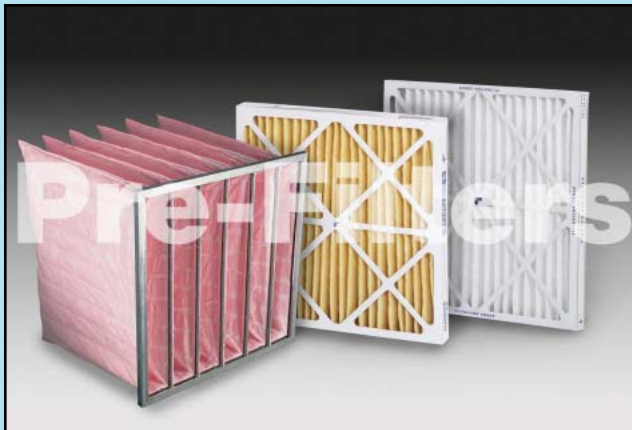

In business since 1942, Filtration Group is the largest privately held filter manufacturer in North America. We produce a full-line of filtration products that are commonly found in all types of hospitals. Our product line includes filters for HVAC, cleanroom, high efficiency, bio-safety and gas phase applications.

Filtration Group understands the demanding filtration needs of hospitals. Our sales representatives are experienced in the unique needs associated with healthcare facilities and can assist you in achieving the desired IAQ conditions for your facility.

We have quality products for all areas of hospital operations; such as, recovery rooms, office space, surgical rooms and emergency rooms.
